

Financing College and Other Post-Secondary Educational Opportunities:
A Guide to Saving

All families want what is best for their children. An education and acquiring skills for a career are top priorities.

That is why it's so important to begin planning for your child's post-secondary education as early as possible.

Please attend our annual presentation to discuss how to begin planning for your child's future. **This takes place in the MMS Cafeteria an evening early in January.**

You will learn:

- how to take the first steps in developing a plan for financing your child's future education
- find out how financial aid works
- college pricing
- compare how different savings plans can impact financial aid

Please arrive early to share in some healthy snacks.

Please RSVP the school counselors if you are planning to attend.

We look forward to seeing you.
